

AnyKey User Manual

1、Product picture

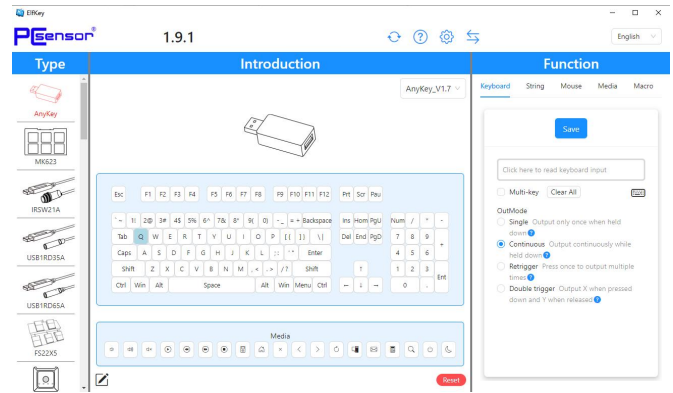

Anykey is a keyboard value mapping tool that allows you to redefine the value of each key on your keyboard, you can modify the key and enable it with different function such as shortcuts, key combo, mouse clicks, string input, multimedia and macro definition. Anykey is compatible with most of regular keyboards.

- 1.1. Keyboard function: It can be set to any single key or key combo(including F13 to F24, etc.), for example, it can modify key "F1" to "CTRL+C" function.
- 1.2. Mouse function: you can set the mouse left click, right click, center click, forward, backward, and mouse scroll up/down or other actions. You can also set the X, Y axis movement.
- 1.3. String function: Continuously output letters or symbols, up to 38 characters like "hello, world."
- 1.4. Multimedia function: Common functions such as volume +, volume -, Play/ Pause, one-click open "my computer" etc.
- 1.5. Macro definition function: This function can set a combination action of keyboard and mouse. For example, set "Ctrl + P" and "delay 100ms" and then "enter" to realize the automatic printing.
